January 23, 2020

Good Day!

       Card Industries is asking for your permission to allow us to remove modules from our development checklist and functional requirements specifications. As the second term start an unexpected system was released in the university which is the **Online COR Revision**. This system allows the students to revise their COR through online process with a payment per transaction. With the release of this system we, the in line with this, we would also like to remove the **OSES** from our modules.

       These are the modules to be retained:

- Student Course Flow Analysis
- Admin
  - Dashboard
  - Student Account Management
  - School Announcement
  - All Curriculum
  - Academics (Parallel Courses, Course Offerings)
  - Online Course Petitioning System
  - Underload/Overload Processing
  - Simul Request Processing
  - Notifications
  - Change Password

- Student
  - Dashboard
  - Announcements
  - My Account (Profile, Curriculum, Course Card, COR, Balance Inquiry)
  - Academics (Parallel Courses, Course Offerings)
  - Services (Course Petitioning, Underload/Overload Request, Simul Course Request, Faculty Evaluation)
  - Others (Student Handbook, CMO guideline)
  - OSES (Enrollment Link, Tutorial Link, OSES User Guide Link)
  - Change Password

       These are modules to be removed:

- COR Revision
- OSES
